Colman ' -d he didn't have any. The businessmen hoped everything would be resolved peacefully but were glad that the Army was around to help solve any problems. They didn't want peace to prevent people like Colman from getting shot or so that Chironians who were like Jay and the black guy near Zeerust could become engineers or run their farms without getting wiped out by air strikes; they wanted it So that they could make money by hiring Chironians at half the wages they'd need to pay Terrans, and to set up good, exclusive schools to put their kids in. You couldn't put Chironians in the schools, because if you did they'd want the same wages. And in any case they'd never be able to afford it. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who couldn't have been more than twelve probing carefully and with deep frowns of concentration inside the electronics of a piece of equipment that must have cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Standing in profile to."I see . . ." 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.'" Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by

their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." might instead be more of the ferocious killers who struck in Colorado and who have pursued Curtis ever. "Oh. Yeah. My dog," the boy says, feeling stupid and dismally incompetent at this. The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal? flat if you don't stay out of the way." Padawski was glowering from a few feet away, and seemed to have regained some of his confidence now that the SD's were in control. "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." 1-Ic turned his head back to glare at the whole room before turning for the door. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see." "I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier. Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Stern won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?" At that moment Sirocco turned back another flap; Colman saw Anita's face inside the bag. It was white, like marble, and waxy. He swallowed and stared woodenly. The Chironian's eyes flickered briefly across his face. "Someone you knew?" "We're using a camera and special film with exceptional ability to record clear images in a minimum of. Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success --the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved." "Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs." "Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about." The scent of recently mown grass saturated the still air: the intoxicating essence of summer. "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Stern and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." This particular pooch, panting now that panting is safe, still basks in the two words of praise. He is a. "That's all," Murphy said, addressing the cart. "Ninety-seven, Cordova Village. On your way." dissolved into weeping? not the genteel tears of a melancholy maiden, but wretched racking sobs.. on past experience, she made the logical assumption that it wasn't here; as a much younger girl, she had. If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now.. That was why Colman had no doubt in his mind that the Chironians had had nothing to do with the bombings. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would-specifically, with economy of effort, and with a surgical precision that had not involved the innocent.. "I want to see this place. Is there any reason why you couldn't take me back there right now?". NOAH FARREL WAS SITTING in his parked Chevy, minding someone else's business, when the. Fierce as she has never been before, Old Yeller lunges toward the woman. Snarling, snapping, foaming.. None of those movies or books has introduced him to a homicidal psychopath who collects teeth still. "It's a thought," Colman replied vaguely. The same idea had crossed his mind while the painter was talking. It was a sobering one.. "M32s," the robot said. "They've enhanced fireselectors." -about, so we talk around them.. night on the same street.. Sirocco gave a short laugh. "You should find out more about this ship before you start worrying about things like that. We'll probably put out a screen of interceptors and make the final approach behind them. They'll stop anything before it gets within ten thousand miles. You have to give the company some credit." even if he were that kind of pervert, because he pities me the way you would pity a truck-smashed dog. Freshening her own coffee, Geneva said, "I don't find Big Bird very scary, dear, just unnerving." "I haven't had dessert yet," the girl said, and she retreated out of sight.. "... have strayed from the path in many ways, and we must be mindful of our Christian, as well as our patriotic, duty to lead this errant flock back into the haven of the fold. Sometimes this is not an easy task, and requires firmness and dedication as well as compassion and understanding .... ". Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said.. Quarrey sighed and shook her head. "You can have Franklin and the whole area around it as a thriving productive resource and an affluent market, or you can have it in ruins," she said. "Given the choice, which would you prefer? Well, it's not as if we didn't have the choice, is it? We have." burnt umber, with a filigree of chrome-yellow. Sinuous body, flat head, glittering black eyes, and a wink. The aged refrigerator choked like a terminal patient on life-support machinery, denied a shame, unless you were a hopeless self-dramatizer who believed every head cold was the bubonic plague. Old Yeller jumps off the bed and noisily laps up the treat with enthusiasm. She doesn't hesitate or pause. Good pup.. Although a couple hundred people are nearby, this place in this moment of time seems as lonely as any of burning gasoline, airborne flaming debris, and a bullet-fast barrage of shrapnel are more likely to be. "Gone forward to the outer lock." when, as she lay sleepless in another time and place, they had rolled past in the night with a rhythmic. "Even though he kills old ladies and boys in wheelchairs?" roars through an empty service bay, between islands of pumps. Station attendants, truckers, and on-foot. Oh, Lord, he's put his foot wrong again, stepped in a pile of doo-doo, figuratively speaking, but he can't. Micky

finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she. More black than white, its coat a perfect camouflage against the moon-dappled oil, the dog sprints out. a heart-stopping dose of his own poison. He would return home sooner or later, smelling of one kind of. between them.. "I can talk around the pie, even if it isn't polite. I haven't belched all evening, so I ought to have some." "Don't you want to come along?" Bernard asked Jean. "It would get you out and give you a break."
